# *Introduction*

EICEFALA is an event promoted by UFMG laboratories from Faculdade de Letras (Laboratório de Fonologia) and Escola de Engenharia (CEFALA).

The comprehension of human communication involving speech acoustics and gestures requires knowledge from various fields of science, such as phonetics, phonology, linguistics, acoustics, mechanics, mathematics, physiology, neuroscience and computer science. The objective of the 7th EICEFALA is to present and discuss theoretical and methodological techniques to researchers from the several areas of knowledge working with speech science: linguists, engineers, physicists, speech therapists, musicians, etc. It is expected that the participants of the event find, at EICEFALA, a transdisciplinary forum to address questions related to spoken communication.
