1 Introduction

This is a nice little introduction with a reference to Figure 1.

Abbildung 1: This is a figure with a caption (Krämer, Schnurr & de Streel, 2017, p.15).

Different cite-commands can be used:

- citet results in: Becker, Koziolek und Reussner (2009)

- citet (again) results in: Becker et al. (2009)

- citet* results in: Becker, Koziolek und Reussner (2009)

- citet* (again) results in: Becker, Koziolek und Reussner (2009)

- citep results in: (Becker et al., 2009)

- citep* results in: (Becker, Koziolek & Reussner, 2009)

- cite results in: Becker et al. (2009)

- citealp results in: Becker et al., 2009

- citealt results in: Becker et al. 2009

- citeauthor results in: Becker et al.

- citeauthor* results in: Becker, Koziolek und Reussner

A citation may either appear at the end of a sentence in parentheses. For example: Start of sentence "[...] random citation [...]" (Bernheim & Whinston, 1990, p.20). Or you can cite the author(s) within the sentence. For example: Further information can be found in Cassar und Friedman (2004).

More examples for different types of sources: This sentence contains a citation of a legal recommendation that has been published in the Official Journal of the European Union (European Commission, 2013). In-text citations of working papers also include author names and year (see, for example, Krämer & Wiewiorra, 2016). Breuer, Ranaivoson, Buchinger und Ballon (2015) is an example for a citation of a conference paper.

2 Content Section 1

Of course, the content chapters of your thesis should be renamed. The number of chapters you need to write depends on the specific task(s) of your thesis and cannot be said in general.

2.1 Subsection 1

You can reference any chapter, section or subsection by its label: looking forward to Section 2.2. You can also reference Appendix A and add footnotes if necessary.[1]

…

2.2 Subsection 2

You can add tables by using the following commands. There is no need for a list of tables or a list of figures in this paper-style thesis. But you should always reference tables and figures in the text (see Table 1).

Item		
Animal	Description	Price ($)
Gnat	per gram	13.65
	each	0.01
Gnu	stuffed	92.50
Emu	stuffed	33.33
Armadillo	frozen	8.99

Tabelle 1: A table that lists items (based on Becker et al., 2009)

3 Content Section 2

During the writing of your thesis, you may want to highlight some parts or take notes. This is accomplished by using the following command for highlighting or taking notes in the text.

This is a note in the text

If you want to take notes on the side, use the following command. Also make sure that you remove all your notes before submission.

This is a marginal note

---

[1]This is a footnote ending with a full stop.

3.1 Subsection 1

Adding formulas is easy. Either inline formulas like $E = mc^3$ or unnumbered equations like

$$E = mc^3$$

or a single numbered equation like

$$E = mc^3 \tag{1}$$

or multiple numbered equations that are aligned like

$$E = mc^3 \tag{2}$$
$$a^2 = b^2 + c^2. \tag{3}$$

You can also reference the equations if you set a label. Our approach is captured by the fundamental equations (2) and (3).

3.2 Subsection 2

…

4 Discussion

…

4.1 Subsection 1

…

4.2 Subsection 2

…

5 Conclusion
